Current role	Customer Services Assistant at Co-Op and Frontend Developer at Self-Employed
Technologies	React, CSS, Redux, HTML, JavaScript, Next.js

My favourite technology is...
ReactJS because it makes creating a website a much easier flow with the easier of installing packages and then writing the JSX code for the website.

Work experience

Customer Services Assistant, Co-Op 

Nov 2022 – Present (5m)

- Provided exceptional customer service to all shoppers, greeting and assisting them in finding products.
- Operated the till with precision and speed, handling cash and card transactions effectively.
- Monitored the stock levels, maintaining a well-stocked and presentable store at all times.
- Contributed to the smooth running of the store by ensuring a positive shopping experience for customers.

Frontend Developer, Self-Employed 

May 2021 – Present (1y 11m)

React

CSS

Redux

HTML

JavaScript

Next.js

- Collaborate with clients: As a self-employed frontend developer, you work closely with clients to understand their website needs and translate those into a website design. This includes discussing website goals, target audiences, design preferences, and functionality requirements.
- Create website designs: Using your expertise in HTML, CSS, and JavaScript, you design and create custom website layouts that meet the client's specifications. You may also use website builders or content management systems (CMS) to create and manage website content.
- Optimize website performance: As part of your work, you ensure that the website is optimized for speed, functionality, and user experience. This may include improving website load times, optimizing images and videos, and testing the website across multiple devices and browsers.

Education

Greshams School

A-Level (C) Business Studies

Greshams School

A-Level (D) History

Greshams School

Aug 2021 – Jun 2022 (10m)

A-Level (C) Computer Science

- Created projects in my own free time

Snippets

Portfolio @ donkscook.xyz

I have linked above my portfolio, where I have numerous projects I have worked on, and thoroughly enjoyed and I am currently working on another website for a huge customer base hoping to be adding soon to the Portfolio

More about me

My favourite technology is...

ReactJS because it makes creating a website a much easier flow with the easier of installing packages and then writing the JSX code for the website.

Interests

I enjoying playing games with my mates. But I most enjoy playing single player campaign games, aswell as playing with my two kittens and dog.
